- **Problem Statement Title- Real Time Parking Tracking**
- **Theme- AI Based Automation**
- **PS Category- Software & Hardware**
- **Team Name - Scouts**
- **Institute Name- Geetanjali Institute Of Technical Studies**

THE PROBLEM

No real-time information about vacant parking spaces.

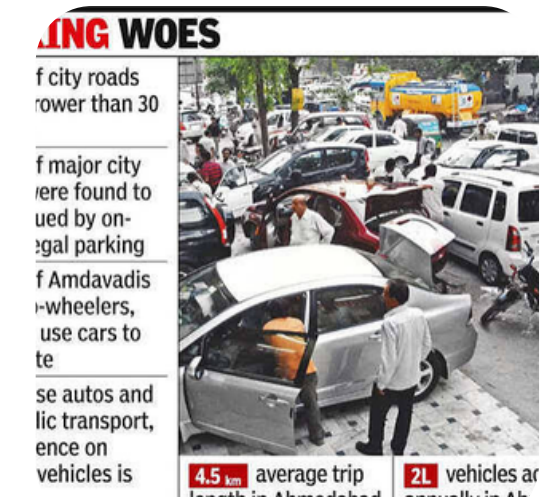

Drivers waste time searching for parking.

Parking congestion increases accident risks.

Heavy dependency on parking attendants.

Inefficient systems lead to revenue loss.

Unmanaged parking wastes time, causes congestion, increases safety risks, and leads to revenue loss

EXISTING SOLUTIONS

ParkMobile

- Primarily designed for on-street parking
- No individual slot-level verification
- Does not solve multi-storey parking navigation

ParkMobile

Park+

- No live per-slot occupancy detection
- Availability depends on operator updates
- Limited coverage in Tier-2 cities

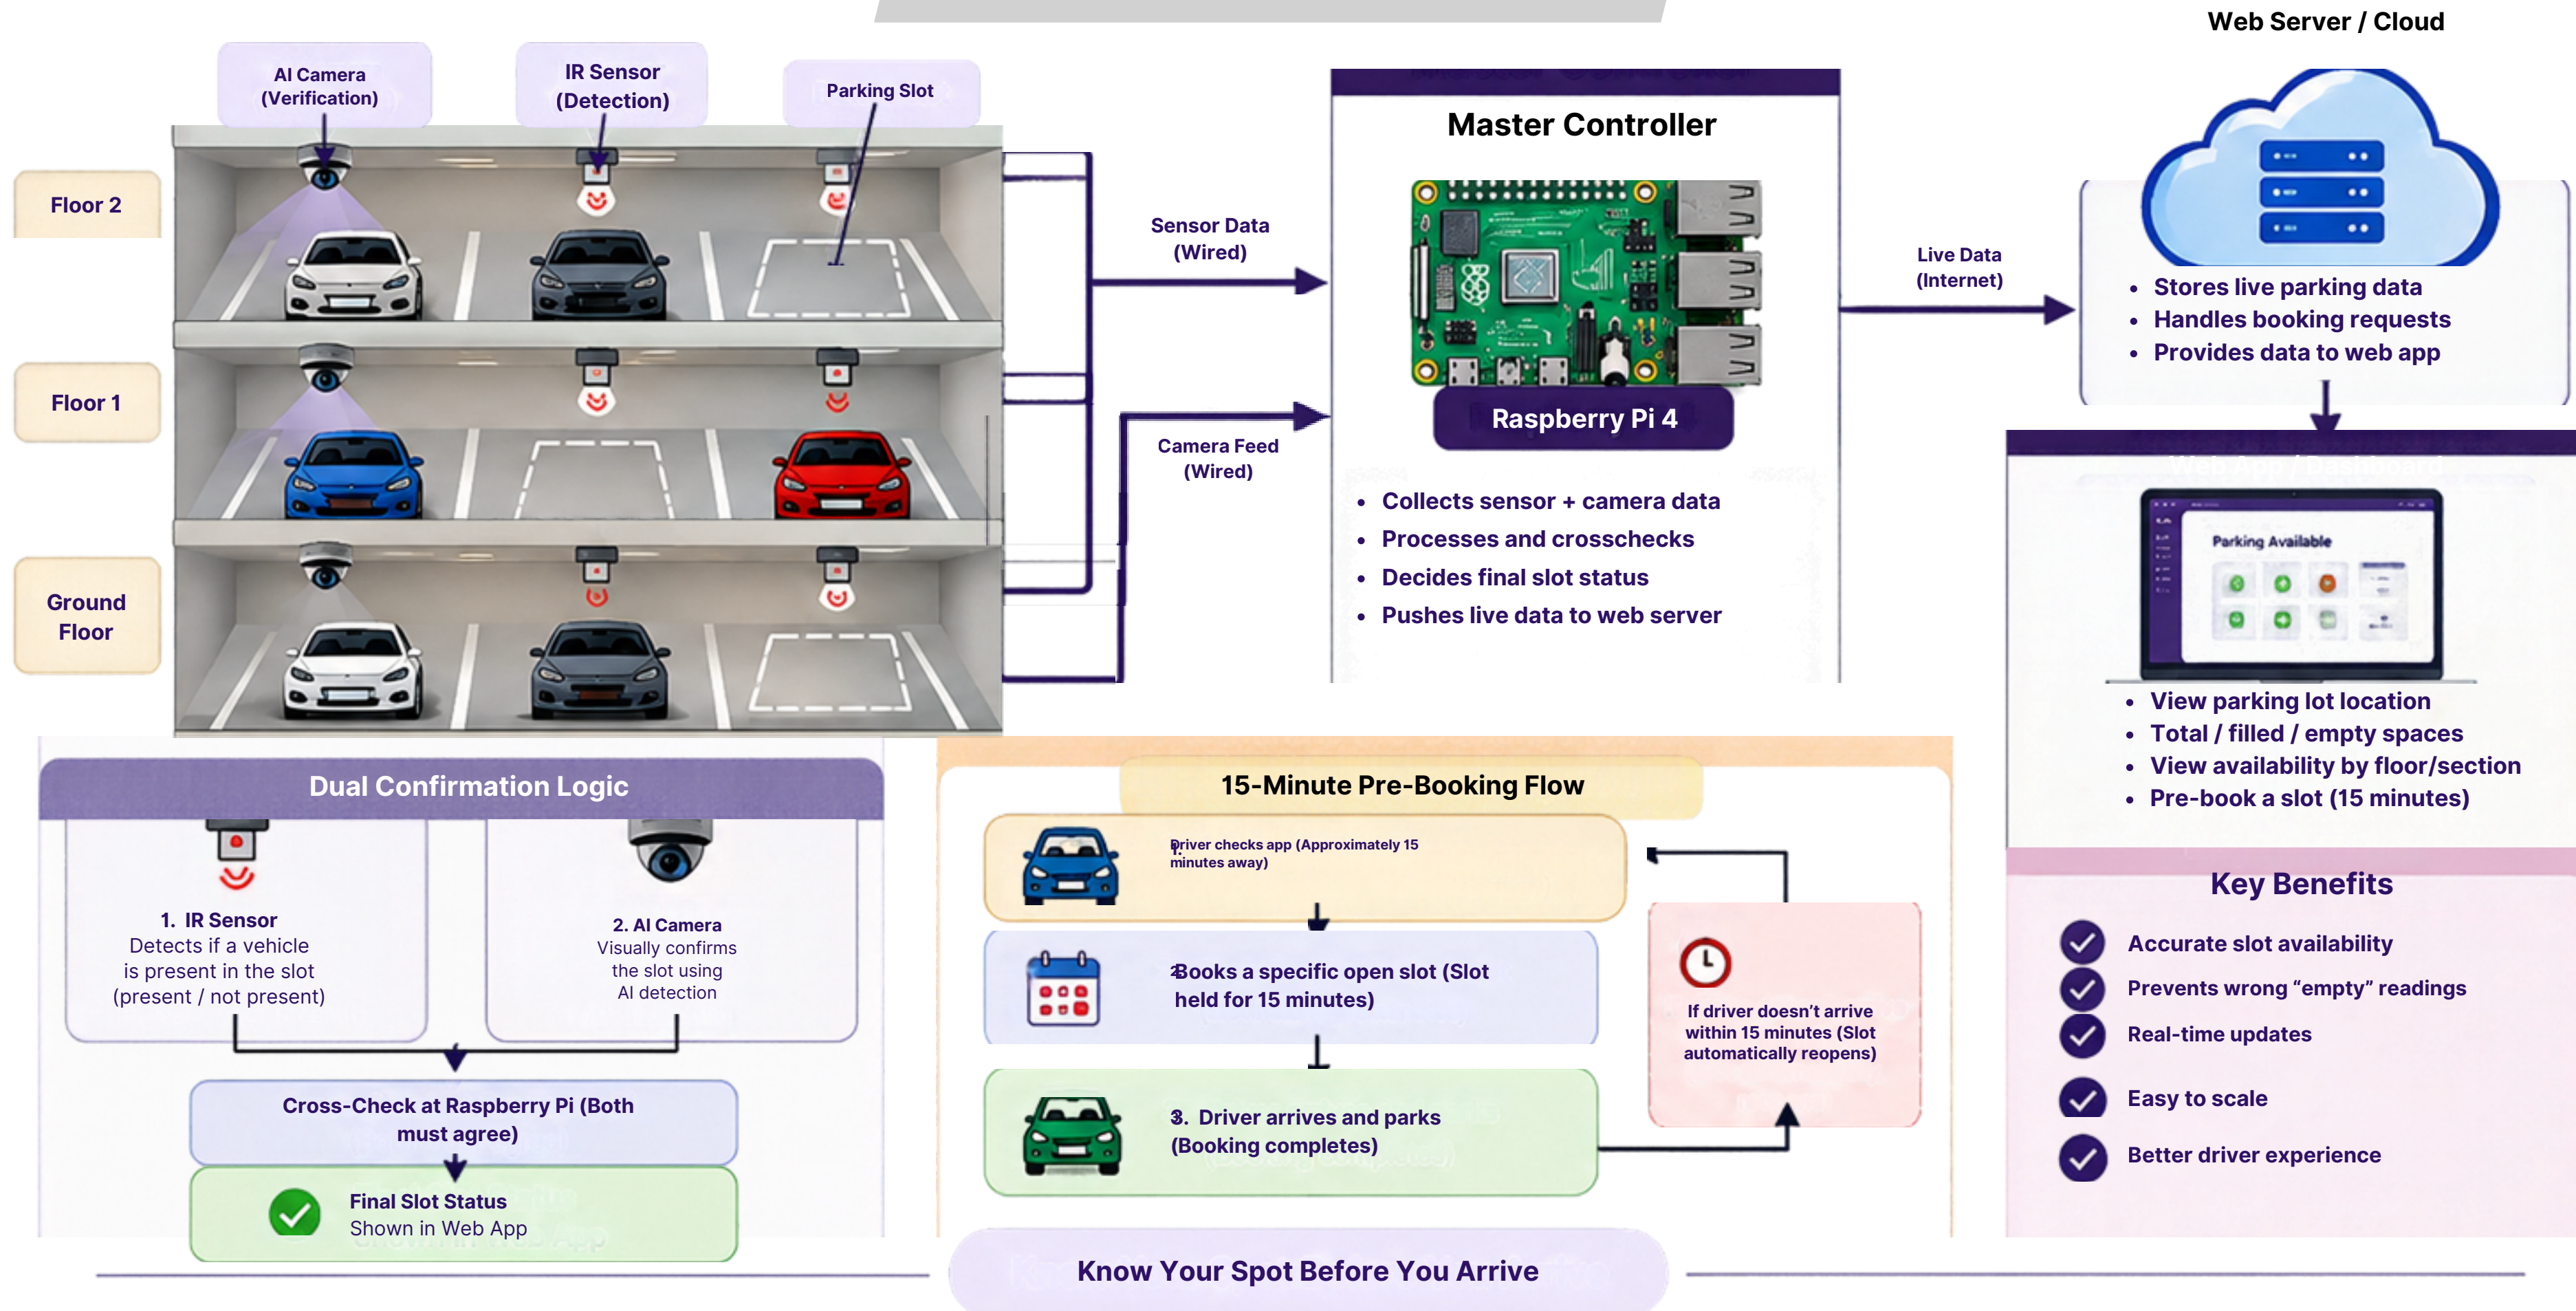

Get My Parking

- Mainly B2B/operator-focused
- Requires costly infrastructure installation
- Limited coverage of small municipal parking

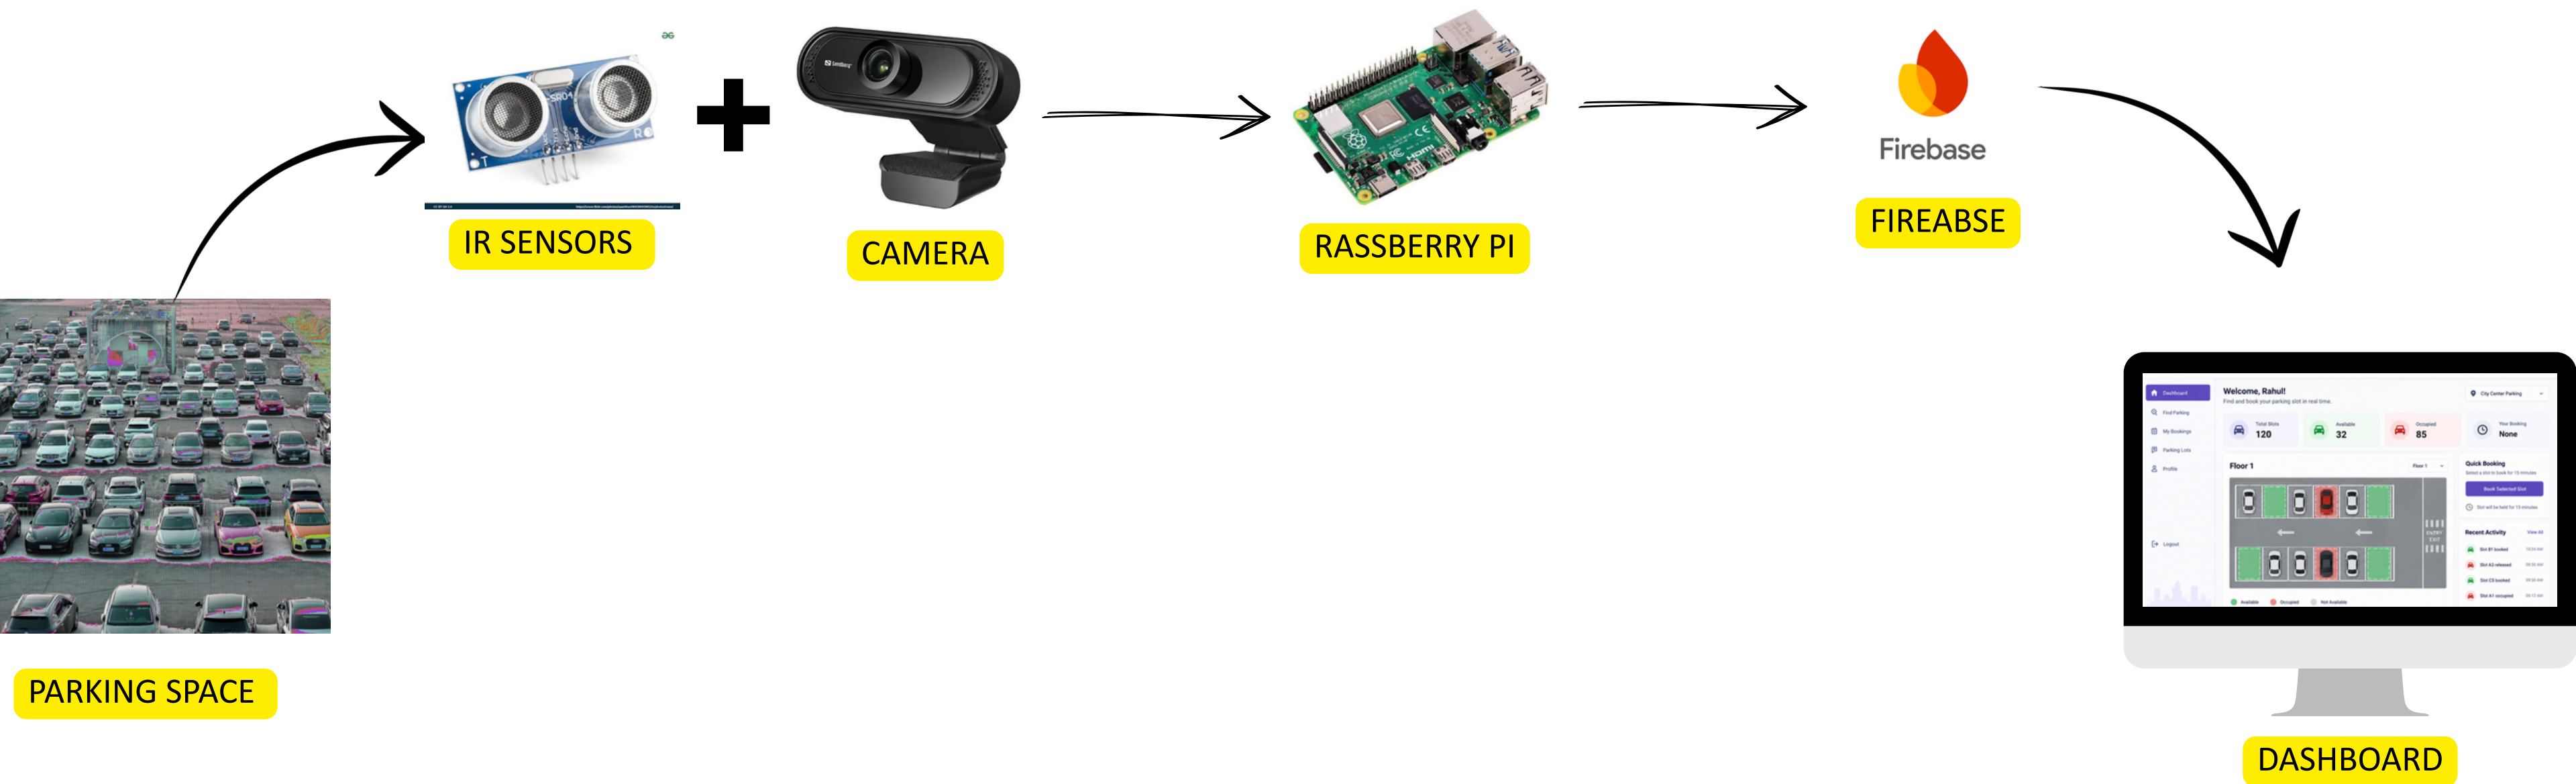

OUR SOLUTION

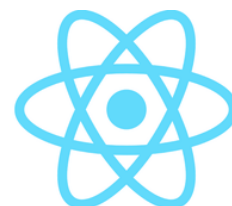

TECHNICAL APPROACH

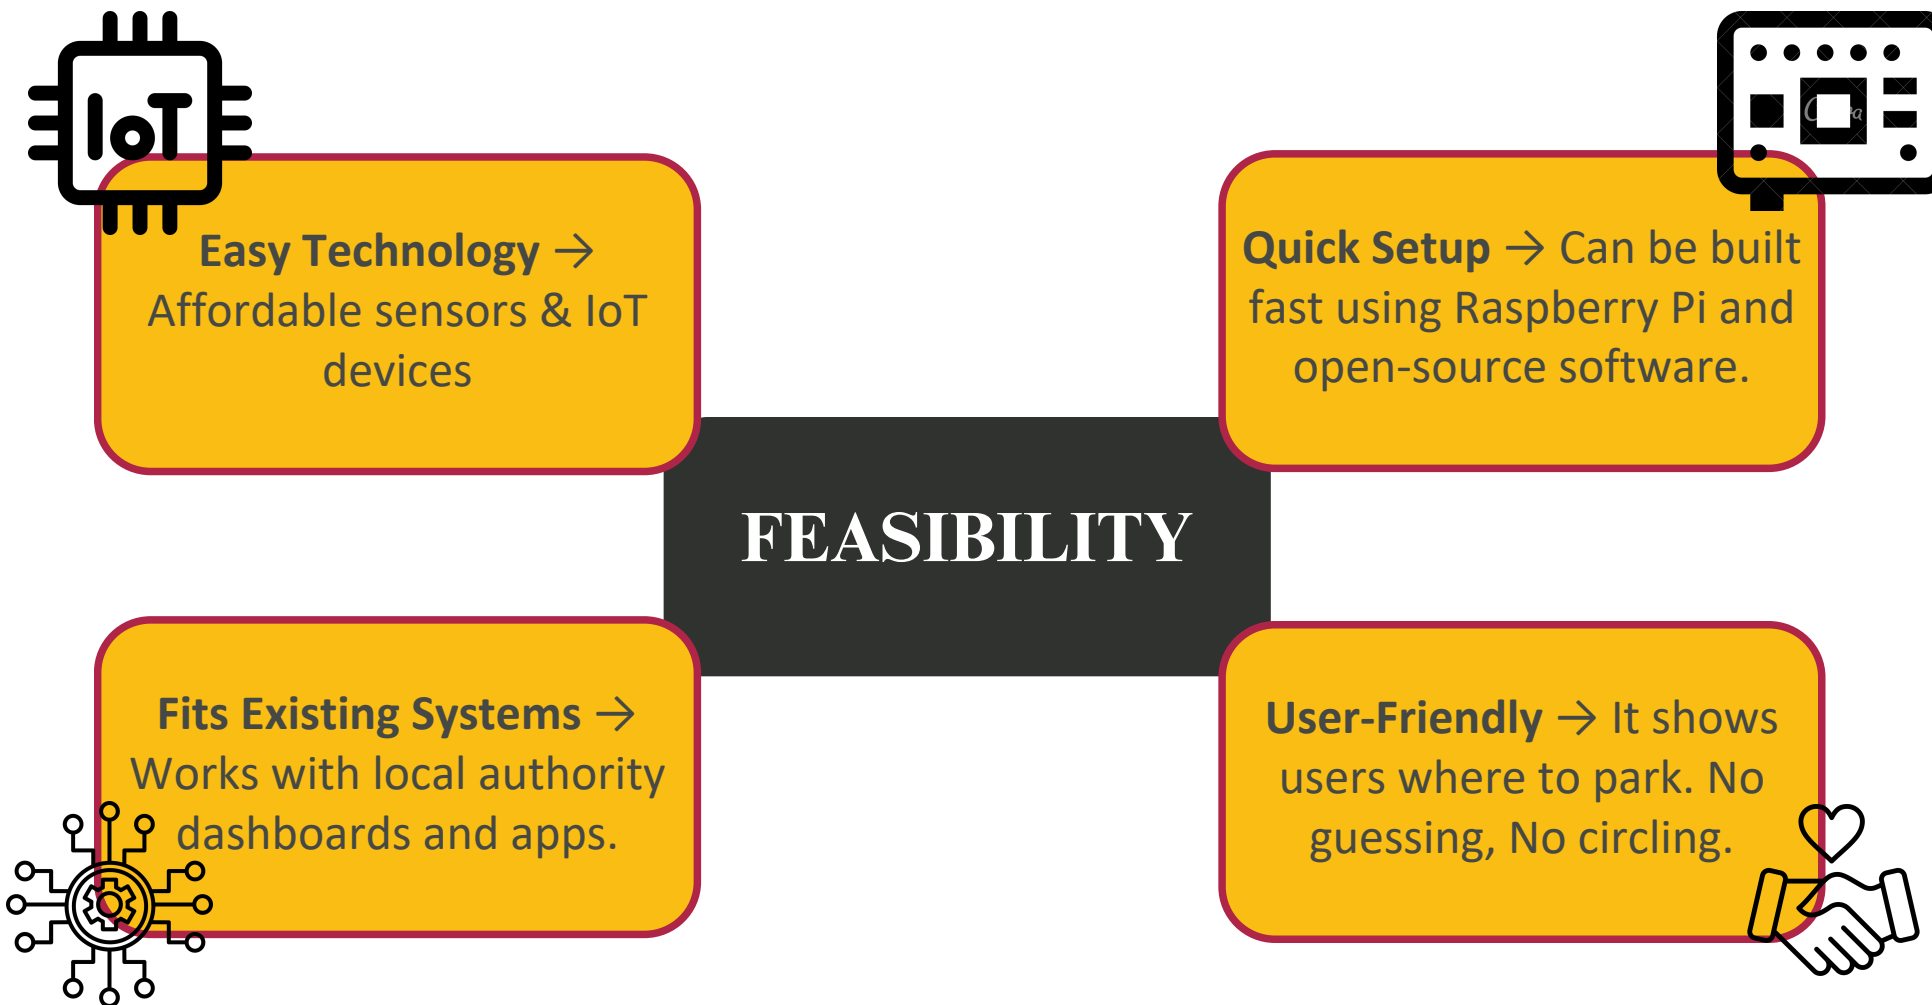

METHODOLOGY

TECH STACK

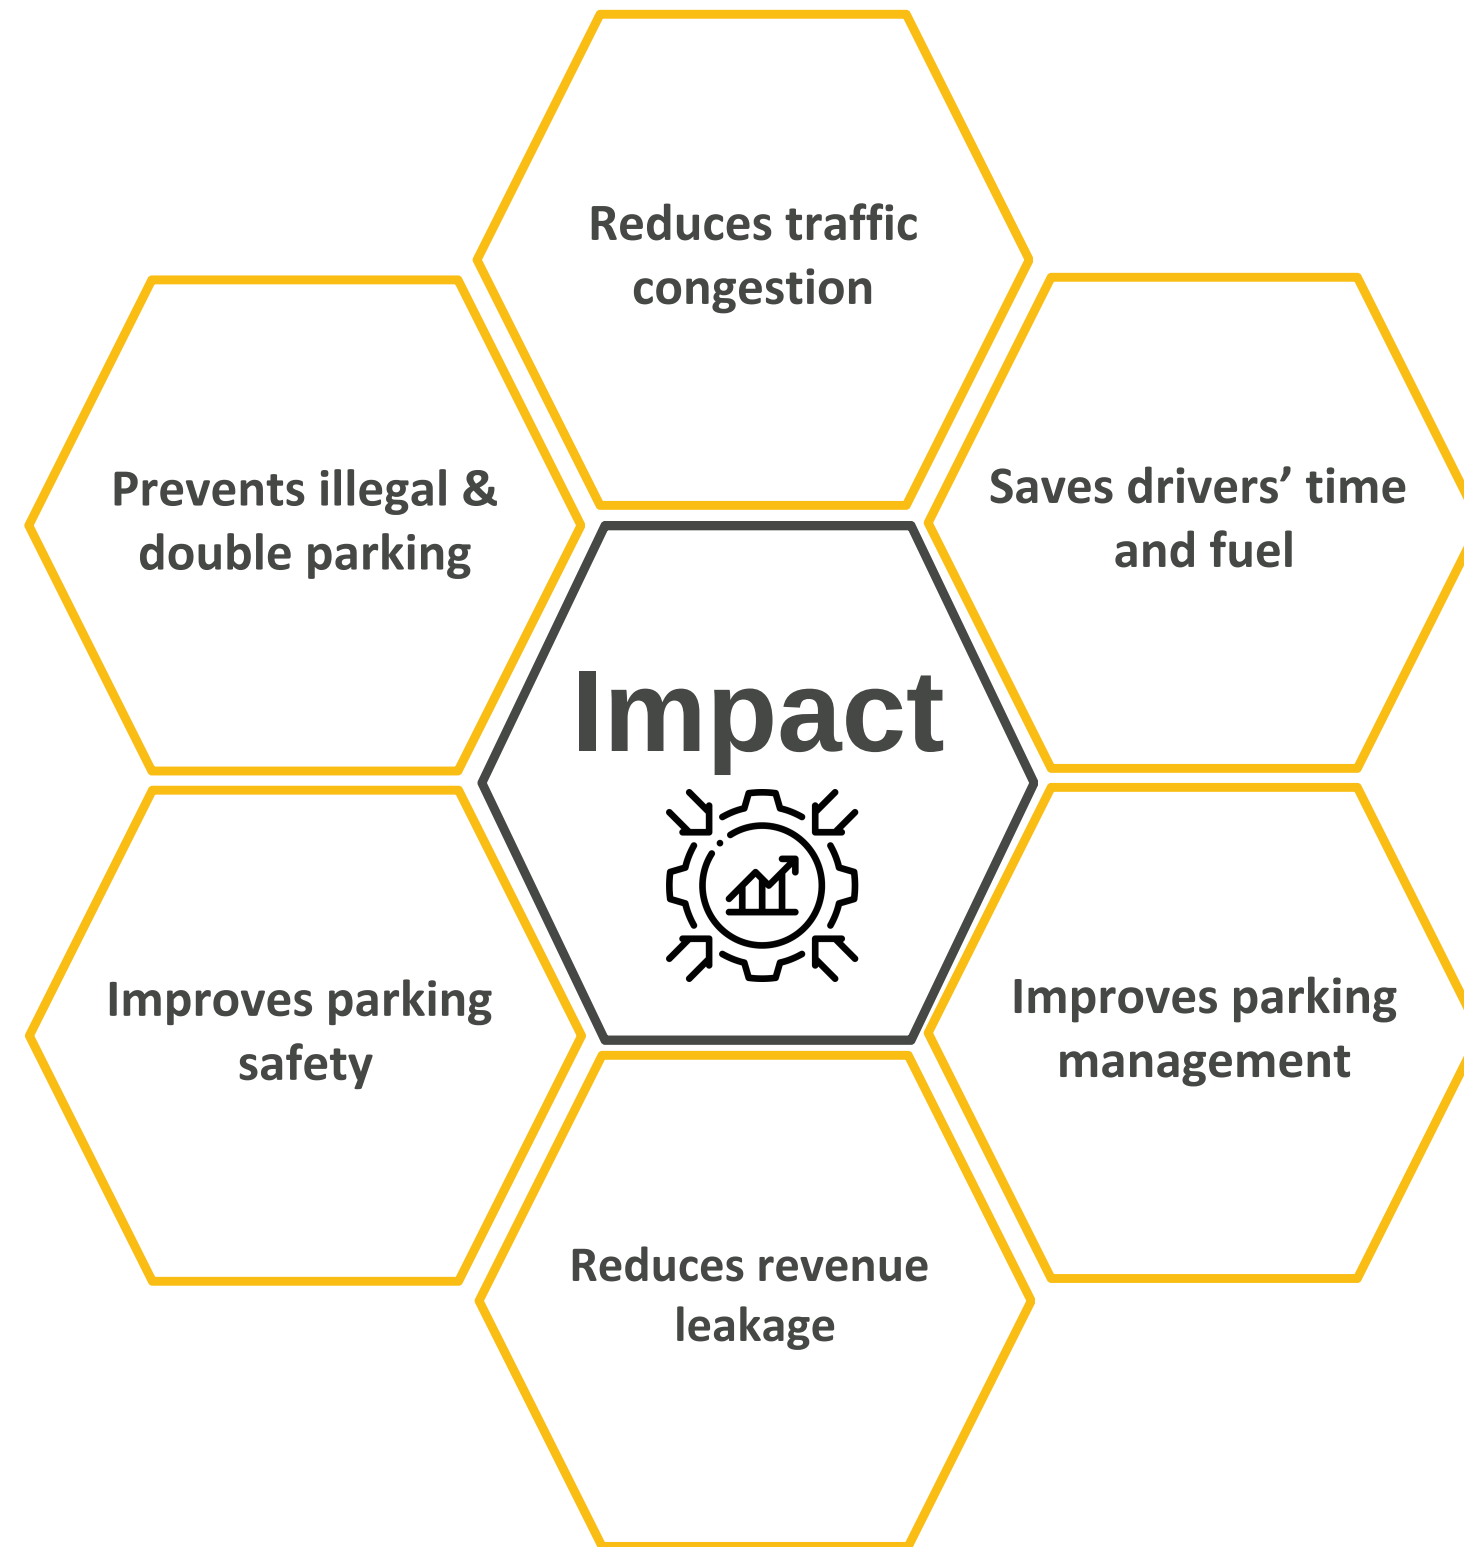

FEASIBILITY AND VIABILITY

VIABILITY

- Cost-Effective**
Low setup and maintenance costs make it affordable for cities.
- Operational Savings**
Automation reduces manual workload and management costs
- Multiple Revenue Streams**
Supports parking fees, reservations, subscriptions, and partnerships.
- Smart City Potential**
Can be deployed across malls, campuses, hospitals, and public parking.

IMPACT AND BENEFITS

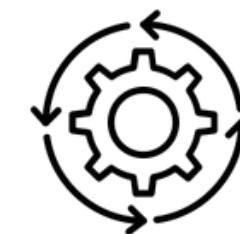

BENEFITS

Real-time parking availability
Drivers instantly find vacant spaces without unnecessary searching.

Faster and easier parking
Reduces parking time, fuel consumption, and driver frustration.

Better space utilization
Uses parking capacity efficiently.

Zero Search Time
Minimizes unnecessary driving inside parking areas.

USE CASES

Drivers & Visitors

Quickly find and reserve available parking spaces.

Shopping Malls

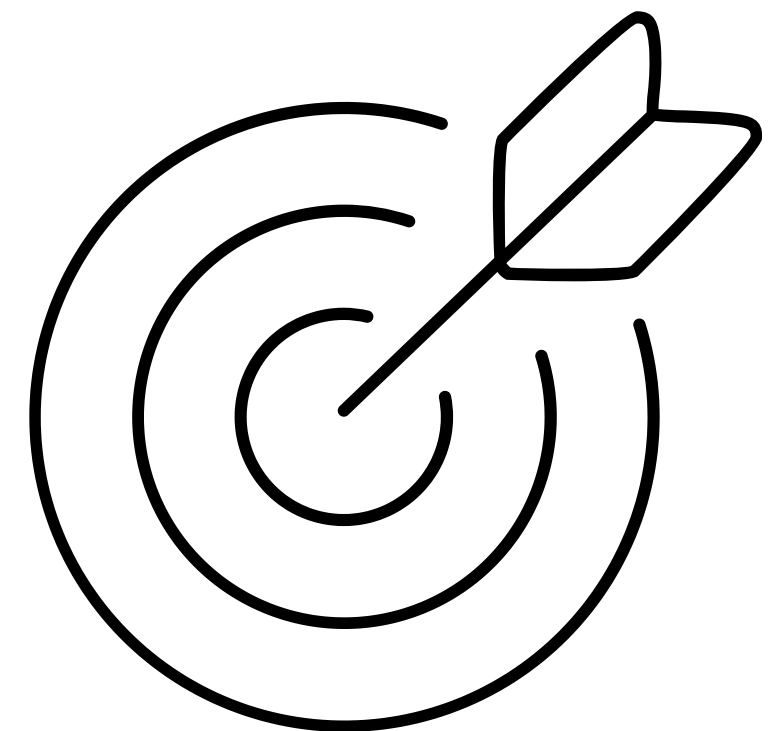

Manage high vehicle volume and optimize parking capacity.

Smart City Parking

Centralized parking management across busy urban zones.

Tourist Destinations

Simplifies parking in crowded high-footfall areas.

Multi-level parking hits roadblock

T Nagar Remains Congested With Cars

Chennai: Several interior roads in T Nagar have become congested with cars as the 222-slot multi-level parking facility built in the commercial hub under the Chennai Smart City scheme has become defunct.

Three of the six floors at the facility are not working as the elevators are out of order, complaints, G

PARKING PANDEMONIUM: Cars parked at the entrance of the defunct multi-level parking at T Nagar

Corporation has not fixed it for four months now. When TOI visited the facility, workers charged ₹20 and parked cars at the entrance or on Thanikachalam Road nearby. While only the fourth, fifth and sixth floors

In an effort to increase the revenue from the parking facility, GCC increased the on-street parking charges, yet few use the multi-level facility as illegally parked cars are not towed away.

V S Jayaraman of T Nagar Residents Association said the parking facility taken to task. "I to take money from the facility and the road. Such curbing the way for pedestrians are getting frustrated," he said.

Corporation sioner De J Rad when contacted sue had been b notice and th submit a report

first three floors. Dhayanand Krishnan, who visited the facility said the top floors were not accessible and workers refused to take cars to available floors too. "They prevented us from taking videos of the empty slots too," he said. Built at ₹40 crore, the facility has been underutilised.

PARKING WOES

- 56% of city roads are narrower than 30 meters
- 36% of major city roads were found to be plagued by on-road illegal parking
- 62% of Amdavadis use two-wheelers, and 6% use cars to commute
- 17% use autos and 8% public transport, dependence on private vehicles is high

4.5 km a length in
